

CONTROL STATION

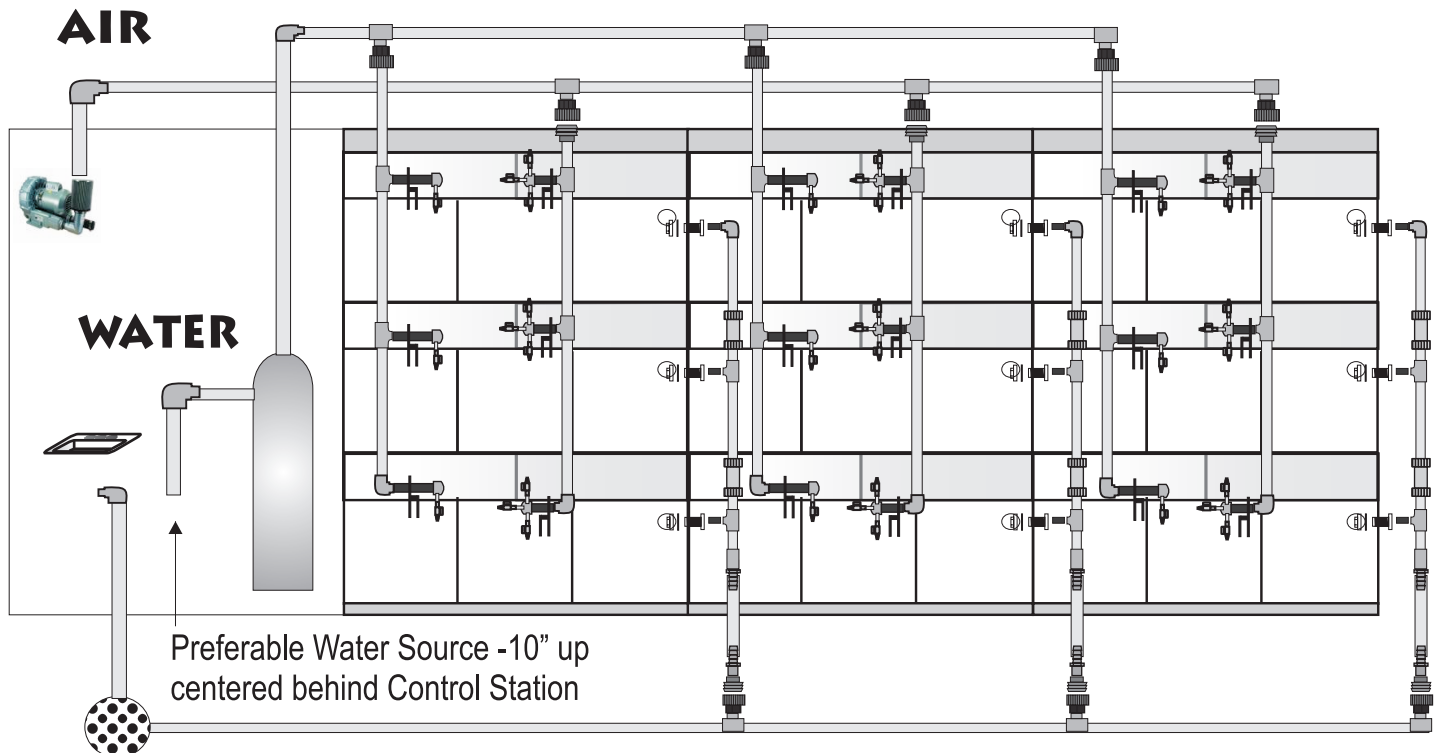

Our Control Station is a great add-on to any F2000 set-up. It adds a convenient space to house the Air Blower and or Carbon Filter (optional). It adds functionality to the units with our Automatic Water Fill Computer. It provides space with a sink for bagging fish plus extra storage for bags and related supplies. The Control Station is designed to blend in with the units. Available colors are Black, Gray and Silver.

SAMPLE SET-UP OF 4 F2000 UNITS

BACK VIEW

Please allow 6" of floor space behind the Control Station

WATER DRAIN

Preferable Floor Drain location - under the sink area of the Control Station.

PLEASE NOTE: A pressure reducer valve is necessary to ensure the water pressure is set between 30-35 psi
