

Aquariums Designed to Complement Nature.

- * Integrated Go Natures Way Biological filtration.
- * Realistic 3Dimensional Backgrounds.
- * Wood Panel 32" Steel Stands with Remove-able Doors
- * Wood Canopies with Easy Access Top Lids.
- * Sizes range from 40 to 270 Gallons.

COLOROPTIONS:

Colonial Oxford Americana Chocolate Vintage

FILTRATION:

High Performance Filtration with our Double Layer Spiral Filter spool using 1 layer of high density and 1 Layer of low density foam. Water travels through the low density layer of foam then spirals very slowly to the center of the spool. The long contact time with bacteria ensures effective breakdown of waste products for optimum water conditions. Our filtration is practical and effecient with minimal maintenance.

BACKGROUNDS:

Our 3Dimensional Backgrounds mimic Nature while hiding the filter, filter pump and or heater. Made of durable, strong material which can be cut to add additional swimmingareas for your fish.

MAINTENANCE:

Check Filter Spools once a year as some rinsing may be necessary. Simply squeeze the spools in a bucket filled with de-chlorinated, drinking or better yet rain water.

INSTALLATION:

Lift stand on one side and turn all levelers to expose 1/4" making sure they are all the same. Place stand in final destination. Lift the Aquarium on top of the tank. Avoid sliding the tank onto the stand to prevent possible damage to the wood. Check to see if the tank is level by using a leveler or adding 1½ inch of water. If the water levels out front to back as well as left to right, your stand is leveled. If not, please adjust the levelers.
